ClockIn Store Descriptions

Prepared for App Store & Google Play

ClockIn (Employee)

Apple App Store

Name: ClockIn

Subtitle (30 chars): Workforce time tracking

Promotional Text (170 chars): Clock in and out in seconds with secure PINs, break tracking, and live status updates. Built for fast, reliable employee punches.

Description:

ClockIn is a fast, secure time-tracking app for employees. Clock in, clock out, start breaks, and view your latest punches from a clean, focused interface.

Key features:

• PIN-based punch in/out

• Break and lunch tracking

• Simple, employee-first experience

• Designed for shared devices and daily use

ClockIn works with your organization's ClockIn system. Your admin configures schedules and reporting.

Keywords (100 chars max): time clock, employee, clock in, clock out, shift, workforce, attendance, break

ClockIn Admin

Apple App Store

Name: ClockIn Admin

Subtitle (30 chars): Admin console & alerts

Promotional Text (170 chars): Manage your team on the go. Get punch alerts, review activity, and monitor who's working in real time.

Description:

ClockIn Admin gives managers and administrators mobile access to the ClockIn system. Review team activity, see who's working now, and receive alerts when employees clock in/out or miss breaks.

Key features:

• Admin login

• Real-time working status

• Push alerts for punches and break compliance

• Manage users and settings on the go

ClockIn Admin requires an active ClockIn organization account.

Keywords (100 chars max): time clock, admin, manager, workforce, attendance, alerts, shift, reporting
